

B42 LOWC LIQUID DEICER

B42 LOWC is a high performing potassium acetate/glycol-based solution. Expertly formulated by our chemists and processed by our engineers to ensure peak performance and consistent quality. B42 LOWC is stable in storage with no agitation required. It is specifically formulated for reduced conductivity. B42 LOWC can be used as an anti-icer or deicer.

Product Specifications

Composition	Appearance
15-40% potassium acetate and propylene glycol by weight	Clear, free from matter in suspension
Density	pH
8.47 lbs/gal	7.0-9.0
Specific Gravity	Flash Point
1.015-1.050	Nonflammable
BOD	COD
0.19 kg O₂/kg fluid	0.34 kg O₂/kg fluid

ECO-FRIENDLY

- ❖ **LOW TOXICITY TO FISH AND MAMMALS**
- ❖ **READILY BIODEGRADABLE**
- ❖ **DOES NOT CONTAIN UREA OR GLYCOL**

BENEFITS

- ❖ Reduced conductivity ensuring sensitive equipment remains protected
- ❖ Remains stable and effective long-term when stored as directed
- ❖ Complimentary customer training upon request

PERFORMANCE

- ❖ Industrial leading deicing characteristics
- ❖ Low viscosity, sprays effectively at low temperatures
- ❖ Effective at low temperatures
- ❖ Effective ice undercutting
- ❖ Effectively penetrates ice
